About the Workshop

Many rigging accidents can be avoided through proper training. The purpose of this workshop is to promote rigging education and safety. All lifting operations are dangerous! Come learn from the rigging experts on how to inspect, apply and care for rigging equipment. This workshop also provides an excellent opportunity for individuals to meet other attendees or counterparts from other companies and industries who share common problems and experiences.

Course Outline

- Inspection
- Hitches
- Sling Configurations: Chain, Wire Rope, Synthetics
- Interpretation of Load Charts
- D/d Ratios
- Shackle Applications
- Lift points
- Eyebolts and Swivel hoist ring use
